

FREE WEBPAGE DISPLAY

» QUICK GUIDE

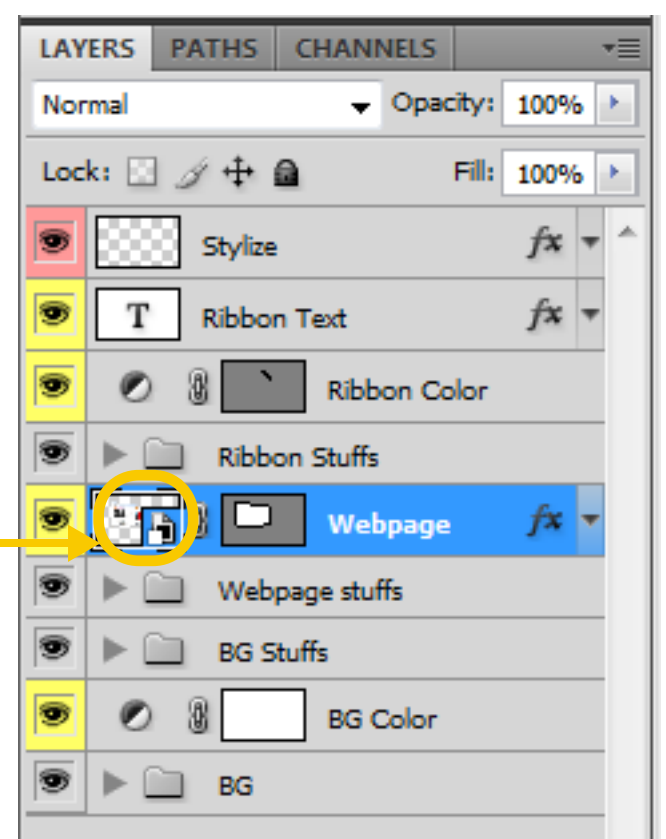

1

After downloading and unzipping, make a backup of your files. Now open “Display-single.psd”. As you can see there are colored and grayed folders in layer panel. Colored ones are customizable.

2

First put your own design on the 3D frame by double-clicking on a layer named “Webpage”. You can also Right-click and choose replace content. The recommended image size is **1026x632 px**.
Paste your work in .psb file and save.
You’ll see 3D frame is now updated!

Click on the icon

3

You can change the background color very easily and smoothly of course! Locate Adjustment layer named “BG Color”. Double click on this icon  Some color sliders show up. Let’s play with them!

4

To change the ribbon color, repeat the previous step on another adjustment layer named “Ribbon Color”.
To change the ribbon text, locate the text layer named “Ribbon Text” and double click on this icon  Change the font and text. We used “Myriad Pro (Bold)”.

5

To add some sparkle effect on your webpage display, locate the top most layer named “Stylize” and make it visible by turning the eye icon on.
